Summary

Entry-level Full Stack Developer with hands-on experience in building web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Familiar with REST APIs, Git/GitHub, and basic deployment. Eager to learn, collaborate with teams, and contribute to scalable, user-friendly applications.

Skills

Programming: JavaScript, HTML, CSS

Frontend: React.js

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, GitHub, VS Code

Core: API Integration, CRUD Operations

Experience

Full Stack Developer (Self Projects)

2023 – Present

Personal Projects (Remote)

- Followed a structured full-stack development workflow including requirement analysis, UI design, backend development, testing, and iterative improvements.
- Designed and consumed RESTful APIs to enable seamless communication between frontend and backend components.
- Used Postman to test APIs and validate request/response flows during development and debugging.
- Applied Git-based version control with feature branching and meaningful commit messages to manage code changes efficiently.
- Practiced modular coding and code reusability to improve maintainability and scalability of applications.
- Adopted debugging and error-handling best practices to identify and resolve frontend and backend issues.
- Collaborated with peers for code reviews and feedback to improve code quality and follow industry best practices.

Projects

Edu-Tracker — Full Stack Web Application

2025

Personal Project — Tech: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

- Developed a full-stack student tracking system with user authentication, role-based access, and CRUD operations for managing student records.
- Built RESTful APIs to handle data operations and integrated frontend with backend services for seamless user interaction.
- Implemented a responsive UI to ensure smooth usage across desktop and mobile devices.

Restaurant Management App — Full Stack Web Application

2025

Personal Project — Tech: HTML, CSS, JavaScript, Node.js, Express.js

- Created a restaurant web application to manage menus, orders, and basic user interactions through a clean and intuitive interface.
- Designed modular frontend components and integrated backend APIs for dynamic data rendering.

Awards & Certifications

- Full Stack Web Development Certification (2025):** Completed hands-on training covering HTML, CSS, JavaScript, Node.js, Express.js, and basic database integration through real-world projects.
- Generative AI Course Certification (2025):** Completed a foundational course on Generative AI concepts, prompt engineering, and building AI-powered applications.
- Git & GitHub Fundamentals (2024):** Learned version control, branching strategies, and collaborative workflows for managing codebases.

Education

B.Tech in Computer Science Engineering

2023 – Present

Amity University
